

Energy Policy

SANSERA is one of the most-preferred precision forged and machined components suppliers for the automotive and aerospace fraternity.

SANSERA caters to the needs of its customers from its plants situated Pan-India.

SANSERA being a responsible corporate entity, we shall strive to improve our energy management and energy performance and promote the long-term environmental and economic sustainability of our operations by effectively implementing an Energy Management System (EnMS) in accordance with ISO 50001:2018. To attain success in this endeavor, we are committed to:

Succeed in implementing our Energy Management System.

Always procure and utilize energy-efficient products and services and design new projects in an energy efficient manner.

Nurture required competence and provided awareness to all personnel across the organization to enable them to contribute suggestions for improving EnMS and organization's energy performance.

Strive to attain and sustain continual improvement in our energy performance and the EnMS.

Ensure continued compliance with legal and other requirements related to energy use, consumption and efficiency.

Reducing energy consumption in our manufacturing operations by attaining objectives and energy targets.

Assure availability of necessary information and resources to achieve objectives and energy targets.

Sansera will support the purchase of energy efficient products and services wherever possible. All personnel working for and on behalf of our company are expected to support this commitment in their daily roles where we all can help to improve our energy performance.

F.R. Singhvi
Joint Managing Director.
